

## Trip to National Zoological Park

(31<sup>st</sup> July, 2024)

‘Nature is Nurture’. Considering the importance of preserving the nature and being close to environment contributors, the Institute of Vocational Studies under its Eco- Club organized an entertaining educational trip to National Zoological Park, Delhi on 31<sup>st</sup> July, 2024.

The National Zoological Park is home to a large number of species of birds, reptiles and mammals which live in an environment that in many ways resemble their natural habitat. The zoo provides a home for endangered species rarely available anywhere. Some of the special attractions at the Zoo included White Tiger, Gaur, Jaguar, Rhinoceros, Elephants, Brow-antlered Deer (Sangai), Lion-tailed Macaque, Migratory birds etc. The National Zoological Park of Delhi with a sprawling area of 176 acres and housing more than 1300 animals representing almost 130 species of animals and birds around the world provided an enriching and lucrative experience to the students.

Students keenly observed these amazing species of animal kingdom who are contributing our environment in creating ecological balance and bio-diversity. The visit was not only entertaining but developed an affection and belongingness with these different creatures. Students and the teacher coordinators- Dr. Almas Parveen, Dr. Fozia Roohi, Ms. Nazia Hassan and Ms. Nahid Raees enjoyed a lot and get sensitized with preserving them for survival of everyone. It was an amazing visit and we wish of organizing such other excursions in future.
