Abstract

Change in life is unexceptionally constant NEP2020 is a much awaited milestone step to bring desired reforms and development in the field of education. Many unavoidable changes are proposed in NEP 2020 and among those one is inculcation of teacher education program in multidisciplinary aspect. Integrated teacher education program of four years bachelor degree course talks of introducing teacher education along with bachelor degree so that future teachers must a wide horizon of pedagogy to deal with teaching strategies.

This paper discuss on ITEP and its role in improving quality of teacher education. It also talks about acceptance of changes according to future changes in society and use of new technology. It also discuss on high quality research and development, stressed in NEP-2020 to bring more creativity and innovation in education field.

Key Words: NEP2020, ITEP, Education Technology Research and Development, NCFTE.

Introduction:

Teaching Profession is considered to be the noblest profession of all as it, not only shapes the life of an individual but also governs a mindset which may lead to a creative society. NEP2020 has come up with the same vision to impart basic teacher Education program at all levels of education at higher level. The teacher education program is going to be multidisciplinary, specially focusing on pedagogy. It will be more grounded in subjects so that Innovation and Critical understanding can be developed in each and every scholar .ITEP believes in the fact that a student of Agriculture or Engineering or a vocational student along with primary, middle and Higher Education students need a skilled teacher to teach in best way .
