

Intra-Class Carrom Competition

(20th March, 2025)

The Institute of Vocational Studies conducted an intra-class carrom, and B.Ed students competed in the competition. The aim of the event was not just to promote friendship and camaraderie among students but also to give them an opportunity to improve their concentration and strategic thinking.

Carrom is a popular table top game that involves flicking discs into pockets on a square board. Carrom is usually played between two players, either one-on-one or in pairs. The main goal of this game is to pocket your assigned pieces. (either white or black) and the queen before your opponent does. The first player to pocket all their pieces and the queen wins the game.

During the competition, students not only enjoyed their game but also learned new skills from their peers. Such events not only improve the physical well-being of the students but also give them a sense of teamwork, patience, and sportsmanship.
