Report on Oral Activity: Debate / Speech

Topic: RRR – Solid Waste Management

Date: 14th August, 2025

Our trainee teachers conducted an oral activity on the topic RRR (Reduce, Reuse, Recycle) – Solid Waste Management on 14/08/2025. The activity was organized with the objective of creating awareness among students about the importance of responsible waste management and sustainable living.

The participants expressed their views through debates and speeches, highlighting the urgent need to manage solid waste efficiently. Some students spoke in favour of adopting the RRR principle as a practical and eco-friendly approach to conserve resources and reduce environmental pollution. Others pointed out the challenges faced in implementing waste segregation, recycling systems, and public awareness. Speakers emphasized that “Reduce” helps minimize unnecessary consumption, “Reuse” encourages us to extend the life of products, and “Recycle” ensures that waste materials are converted into useful items instead of polluting the environment. The debate also brought forward innovative solutions such as composting, waste-to-energy plants, and community participation in cleanliness drives.

The activity not only improved students’ speaking and critical thinking skills but also inspired them to adopt eco-friendly practices in their daily lives. The session concluded with the message that effective solid waste management is everyone’s responsibility and RRR is the key to a cleaner, greener future.
