Report on Pidilite Acrylic Painting Workshop

Date: 17th July 2026

Institute of vocational studies has successfully organized a **Pidilite Acrylic Painting Workshop** on **17th July 2026** under the guidance of **Principal Ma'am**, with the aim of encouraging creativity and providing students with practical exposure to fabric painting techniques. The workshop was conducted by representatives from Pidilite, who guided the participants throughout the session.

The workshop began with a brief introduction to acrylic colours, their properties, and their various applications in art and craft. Students brought their own painting materials, including acrylic colours, brushes, palettes, and other essentials, while **pre-printed fabric pieces** were provided by the organizers for the activity. The instructors demonstrated various painting techniques, colour combinations, and finishing methods before the students began working on their own artwork.

Throughout the session, students enthusiastically painted the pre-printed cloth, transforming it into colourful and attractive creations. The finished pieces could be used as **file covers, framed decorative artwork, or handkerchiefs**, making the activity both creative and practical. The trainers interacted with students individually, offering valuable tips and encouraging them to experiment with colours and designs.

The workshop witnessed enthusiastic participation from students, who displayed remarkable creativity and interest throughout the event. The colourful artworks showcased their imagination, patience, and artistic skills. The students appreciated the opportunity to learn a new craft that combines creativity with everyday utility.

The workshop concluded with a display of the students completed artwork and a vote of thanks to the Pidilite team for conducting such an informative and engaging session. Overall, the event was a great success, providing students with valuable learning experience while fostering creativity, confidence, and artistic expression.
