Report on Drug Awareness Program

24 October, 2025

The Institute of Vocational Studies organized a Drug Awareness Program in collaboration with Indian Red Cross Society on 24th October 2025 at its campus in Sheikh Sarai, New Delhi. The session aimed to educate students about the harmful effects of drug abuse, preventive measures, and the importance of leading a healthy and responsible life. The event was conducted in collaboration with the Indian Red Cross Society, which has been actively involved in community health and youth welfare programs.

Objective

The primary objective of the program was to:

- Create awareness among students about drug abuse and its consequences.
- Encourage youth to adopt a drug-free lifestyle.
- Equip students with knowledge to identify early signs of addiction and promote rehabilitation support.

The session began with a brief introduction by faculty members who emphasized the growing concern of substance abuse among young people. Representatives from the Indian Red Cross Society addressed the audience and delivered an insightful presentation on different categories of drugs, their psychological and physiological effects, and legal implications of drug possession and use.

Interactive discussions and Q&A sessions were held where students actively participated and clarified their doubts. A PowerPoint presentation displayed key facts, preventive strategies, and counseling resources available in Delhi for those affected by addiction. The event witnessed enthusiastic participation from B.Ed. and vocational education students. Teachers and coordinators appreciated the involvement of students and the initiative taken by the Red Cross team to educate the youth on such a critical social issue.

The Drug Awareness Program was highly informative and impactful. It successfully achieved its goal of spreading awareness about the dangers of drug abuse and motivating students to become responsible citizens.
