ABSTRACT

IndianTraditional Knowledgeis indigenous system of knowledge and wisdom encompassing fieldssuchas Ayurveda, Vedas, Yoga, Philosophy, Spirituality, Agriculture, Arts, Handicrafts andArchitecturerepresentingrichculturaland intellectual lheritage ofIndiaaccumulatedover centuries. Preserving and promoting Indian Traditional Knowledge is essential to sustain cultural identity, biodiversity, and indigenous livelihood methods. This requires documentation, dissemination, legal protection, and integration of traditional knowledge into modern education.

Information and Communication Technology (ICT) facilitates the digital archiving of traditional knowledge through e-libraries, databases, online repositories and multimedia platforms to ensure that traditional knowledge is systematically recorded, safeguarded and is more accessible to researchers, practitioners, and the public at large.

Indian Knowledge Systems Division (IKS Division) and Traditional Knowledge Digital Library (TKDL) play an important role in preserving and promoting Indian Traditional Knowledge.
