

Report on World Nature Conservation Day Celebration(Under Eco-Club)29-7-26

On 29th July 2026, Institute of Vocational Studies (IVS) celebrated World Nature Conservation Day with great enthusiasm by organizing an educational visit to Chirag Delhi. The objective of this visit was to create awareness among students about the importance of conserving nature and protecting the environment. The event provided students with an opportunity to express their creativity, learn the value of environmental conservation, and actively participate in various engaging activities.

A major attraction of the programme was a Nature-Based Art Competition, where students showcased their artistic talents through beautiful drawings and paintings highlighting themes such as forests, wildlife, clean surroundings, biodiversity, water conservation, and sustainable living. The competition encouraged students to think creatively and communicate meaningful environmental messages through art.

The event was successfully coordinated and judged by Dr. Zainul Abedin and Mrs. Pratibha Sharma. Their guidance, encouragement, and valuable feedback inspired students to participate with confidence and enthusiasm. Both faculty members motivated the participants to understand that every individual has an important role in protecting nature and preserving natural resources for future generations.

Students participated wholeheartedly in the competition and displayed remarkable creativity and imagination. Their artwork reflected a deep understanding of environmental issues and highlighted the need to conserve nature. During the programme, students also enthusiastically raised slogans promoting environmental awareness, such as "Save Nature, Save Future," "Go Green, Keep the Earth Clean," and "Protect Nature for a Better Tomorrow." These slogans created a positive atmosphere and reinforced the message of environmental responsibility. Apart from the art competition, Mrs. Pratibha Sharma conducted a series of fun and interactive games based on teamwork, observation, and environmental awareness.

These activities added excitement to the programme and provided students with a unique and enjoyable learning experience. The games encouraged active participation, strengthened teamwork, and helped students understand environmental concepts in an engaging and practical manner.

The visit proved to be both educational and entertaining. It allowed students to connect with nature while learning about the importance of conservation through creative expression and interactive participation. The faculty members appreciated the sincere efforts of all participants and encouraged them to adopt eco-friendly habits in their daily lives, such as planting trees, reducing plastic usage, conserving water, and keeping their surroundings clean.

The celebration of World Nature Conservation Day at Chirag Delhi was a memorable experience for everyone involved. It successfully combined learning, creativity, and recreation, leaving students with valuable lessons about environmental protection and sustainable living. The event strengthened their sense of social and environmental responsibility and motivated them to become active contributors toward building a greener and healthier planet.

The Institute of Vocational Studies remains committed to organizing such meaningful activities that promote environmental awareness, creativity, and holistic development among students.

The programme concluded on a positive note, with students returning inspired to contribute towards the conservation of nature and the protection of the environment.
